HELPING COMPANIES TO COMMUNICATE

About Us

200+ Employees

Work culture and procedures.

Zona Esmeralda,
Atizapán, State of Mexico.

Operations
throughout the
country.

30 years of experience.

Standouts

Design & Engineering

The D&E department is in charge of project developments according to International Standards and Normativity. Using the most advanced design tools on the market.

Training

Highly qualified staff, each of them certified by our distinguished manufacturers. Our staff is kept in constant training and technological update.

High-tech Tools

Specialized equipment provided with the latest technology, to evaluate and certify fiber optic, copper cables and wireless links.

Consultancy

Throughout our history we have specialized in the consultative sale of projects that include the range of infrastructure solutions for IT networks.

Lab

We have a lab in our facilities to perform demos, POC'S and fault simulations. All this to ensure the correct diagnosis and demonstration of solutions before producing them.

Service

Our own spare parts inventory, which allows us to guarantee the replacement of any part immediately.

Support

Full 24 hour customer service center. The level of IT service focuses on ITIL compliant processes.
